

Prostate Examination Simulator

Prostate Examination Simulator provides realistic training in prostate palpation skills, with its soft life-like anus and rectum material.

Ten types of prostates are placed in the simulator and the trainer can smoothly interchange them using a simple rotating system.

Three patient positions are possible. Compact and space-saving design.

Production supervision:

Dr. Osamu Yoshida, Professor Kyoto University Faculty of Medicine, Department of Urology

Dr. Takashi Katayama, Professor Toyama Medical and Pharmaceutical University Department of Urology

10 prostate cases:

2 normal,
2 enlargements,
5 carcinomas and
1 prostatitis

The lumbar torso can be placed in three patient positions: supine, prone and lateral position.

Built-in prostates can be changed using a simple rotating switch. This saves time for preparation in training and skills assessment.

Soft, life-like material of anus, rectal and lumbar torso provides realistic training in examination procedures.
